December 14th at the Historic Roxy Theatre, 1-2:30

| Film Name | Synopsis |
|---|---|
| A New View of the Moon | Become reacquainted with awe alongside strangers interacting with a telescope trained on the moon. Watch as Wylie Overstreet takes a telescope around the streets of Los Angeles to give passersby an up-close look at a familiar object: a new view of the moon. |
| Blue Carbon | Blue carbon is carbon that's captured and stored by coastal wetlands, helping to mitigate climate change. This film is about mud and the multiple benefits that estuaries provide for us. "You never go into a wetland and just restore one benefit," says wetlands ecologist John Rybczyk. It improves water quality, provides salmon habitat, protects our shorelines, and also benefits our climate. |
| Brothers of Climbing | How can you be what you can't see? Mikhail Martin, co-founder of Brothers of Climbing said, "I literally typed, 'Are there black climbers?' in Google ... someone said, 'black people don't climb.'" A small group of climbers began to challenge that thought. The Brothers of Climbing is a crew that's making the climbing community more welcoming. Watch to see how they created a community where one wasn't. |
| Grizzly Country | After serving in the Vietnam War, author and eco-warrior Doug Peacock spent years alone in the Wyoming and Montana wilderness observing grizzly bears. This time in the wild changed the course of his life. With the protection of Yellowstone grizzlies now under threat, Peacock reflects on the importance of habitat and why he continues to fight for wild causes. |
| Hear the Call: Salmon Nation | In <i>Hear the Call: Salmon Nation</i> , singer Ashleigh Ball of Hey Ocean! travels with filmmaker Josh Thome to the remote coast of British Columbia where marine biologist Alexandra Morton and First Nations Chief Ernest Alfred are on the front lines of a battle that will decide the fate of wild salmon and the entire coastal ecosystem that depends on them. |
| March of the Newts | Follow one of the forest's funkiest creatures into a gangly gathering of amphibious affection... and learn how you can help protect these sensitive animals from an emerging disease. |
| Our National Parks belong to everyone. So why are they so white? | Only 20 percent of visitors to National Parks are people of color. As the broader conservation movement continues to struggle with diversity and inclusion, many worry that the Trump administration will only make things worse. Watch our video to learn about the troubling history of public lands and to meet the conservationists of color who are trying to change the parks' future. |
| Think Like a Scientist: Renewal | Featuring an emerging young scientist from the Lower Elwha Klallam Tribe, <i>Renewal</i> is a heart-warming story of transformation and restoration. Produced with HHMI Tangled Bank Studios, this film is part of HHMI's <i>Think Like A Scientist</i> series. It follows up on Producer Jessica Plumb's award-winning feature, <i>Return of the River</i> , which chronicled the largest dam removal in history. |
| Sky Migrations | Each fall, our skies fill with the wings of migrating raptors, a migration that relies on two hemispheres worth of wild and healthy ecosystems. Join ecologist and filmmaker, Charles Post, as he shines a light on the network of back country scientists and sentinels at the front lines of raptor conservation. |
| A Letter to Congress | Wallace Stegner's 1960 letter to Congress about the importance of wilderness is the framework for a new message, one in which our unified voice can help prevent the transfer of our most valuable heritage— our public lands— to private and corporate interests. |
